EYE SQUAD
Help Iris and Lash save eyes everywhere!

KIDS:
Learn the secrets of eye health and help defeat Professor Blur through:

- PUZZLES
- WORD SEARCHES
- HIDDEN OBJECTS
- and MORE!

PARENTS: We’ve got the intel you need to keep your little hero’s eyes healthy.
WELCOME TO EYE SQUAD HEADQUARTERS
Iris and Lash welcome you as the newest recruit to join the ranks at Eye Squad. Professor Blur’s evil powers are growing because 1 in 4 kids have undetected vision problems. Your mission is to defeat Professor Blur by keeping your eyes healthy and strong.

FIND THE WORDS
Did you know that when you get an eye exam, the eye doctor helps you combat Professor Blur by checking for things that cause blurry vision? Some parts of your eye they’ll examine and some symptoms they’ll look for are in the word bank below. See if you can find them all!

- PUPIL
- RETINA
- CORNEA
- DIABETES
- GLAUCOMA
- ASTIGMATISM

SPOT THE DIFFERENCE
Eye problems often mask themselves as learning disabilities. Since 80% of what you learn is through vision, the better you see, the better you learn. Can you clearly spot the differences between these two images?
TRUE OR FALSE?
- You blink nearly 25,000 times a day.
- Your eyes can get sunburned.
- Your eyes can process 36,000 pieces of information in one hour.

DID YOU KNOW? A fingerprint has about 40 unique characteristics, but an iris has around 256. That’s why retinal scans are increasingly being used for security purposes.

DECODE THE MESSAGE
Foods rich in Vitamin A help keep eyes healthy. So make sure you eat lots of carrots, dark leafy greens, or sweet potatoes. Use your powerful vision to unlock the code and reveal the best way to defeat Professor Blur.

EYEGLASSES • EYE CHART • CARROT • SUNGLASSES • SWEET POTATO
EGG YOLK • FISH • ORANGE

SPOT THE OBJECTS
Professor Blur knows that common eye problems like farsightedness and eye coordination can be missed in a school vision screening. Can you spot the objects in Professor Blur’s lair that can defeat him?

ANSWER: ALL THREE ARE TRUE!
PARENTS,
Did you know that 80% of what a child learns is through their eyes? Trust Pearle Vision to help make sure they don’t miss a thing.

This information can help keep your hero’s eyes healthy:

- **Over ten million kids** suffer from vision problems even after having a school screening.
- **Nearly 80% of sun exposure** occurs before age 21. Protect young eyes with that have UV protection.
- **Two percent** of 6- to 72-month-old kids have amblyopia (or lazy eye), the most common cause of vision loss in children.
- **90% of sports related injuries** can be avoided with protective eyewear.
- **An estimated 76% of kids** haven’t had an eye exam before age 5, even though it is recommended.

Schedule an eye exam today with your neighborhood eye care professional of choice. To learn more about eye exams or to find a Pearle Vision location, visit pearlevision.com.*

*Eye exams available by Independent Doctors of Optometry located at or next to Pearle Vision in most states. Doctors in some states are employed by Pearle Vision.
